

Care & Maintenance

Porssa Porcelain products do not require particular care and maintenance. Thanks to the compact non-porous surface and resistance to chemicals of the products, they are suitable for use in different residential and commercial contexts, for countertops; for floor and wall coverings both indoors and outdoors. No sealer of any kind should ever be used. Sealer leaves a topical film that makes cleaning even harder over time.

For everyday cleaning, a damp cloth and soap or mild detergent is all that is required. We recommend the use of common low-residue neutral detergents. Do not use detergents that may leave wax or silicone residues.

Those wishing to use environmentally safe cleaners may also use a combination of 50/50 vinegar and water, rinsing and drying the surface thoroughly afterwards.

Never use hydrofluoric acid solution or its derivative for cleaning

Porssa is heat resistant, however, any stone material can potentially be damaged by sudden and rapid temperature changes; to prevent damage from thermal shock, we recommend that you use trivets, do not put hot cookware directly on the Porssa surface.

Porssa is scratch resistant, however, we recommend that you always use cutting board.
